

## MILK REPLACER RECOMMENDED FOR FAWNS

**Recipe courtesy of Marika McKinnon, DIAA Secretary and approved as a base ration by Assoc. Prof Tony English, Deer Veterinarian**

ProfeLAC Shepherd Premium lamb-kid-cria milk replacer recommended for fawns

### **Ingredients**

200g profelac shepherd powder to 1 litre boiled cooled water

1 large tablespoon natural yoghurt

1 egg yolk

### **Dosage**

This can be fed from a bottle or lapped from a dish.

Feed 250 mls x 4 times a day from birth and increase to 700 mls x 3 times a day as they get older.

When they start to graze, you can try them on a pellet / grain mix like Laucke Alpaca Blend.
