RECENTLY RELEASED DEER RESEARCH REPORT

Rural Industries Research and Development Corporation

The comprehensive 'Deer Industry Statistics' report, undertaken by Chris Tuckwell, has been released and is now available free on the RIRDC website (www.rirdc.gov.au) or in hard copy from the RIRDC publications unit.

This is really the only source of statistical information about the deer industry. Our industry suffers the fate of many small industries in the census – being amalgamated under 'other'.

The report provides production volumes for both venison and velvet and offers an insight into export figures and the size of the industry.
